# chairman's statement

ON BEHALF OF THE BOARD I AM PLEASED TO REPORT A NUMBER OF DEVELOPMENTS IN THE 2005/06 YEAR. THIS STATEMENT PRIMARILY AIMS TO REPORT ON KEY DEVELOPMENTS IN THE PAST YEAR BUT ALSO TO SET SOME OF OUR FUTURE PRIORITIES.

First and foremost 2005/06 must be recognized by all those who have a stake in the racing industry as the year that the Minister for Racing, the Rt Hon. Winston Peters, delivered tax concessions by bringing wagering in line with gaming and by reducing writedown periods for bloodstock. This will amount to more than \$32 million per year across all three codes. I take this opportunity to thank the Minister, on behalf of the Board of NZTR, for bringing about this change in legislation. It is absolutely critical that racing now ensures that this additional funding is employed effectively for the long-term growth of the industry.

I cover NZTR's proposals for this additional funding later in this statement.

#### **BOARD GOVERNANCE**

Early in the season the Board looked to improving its Governance and has put in place structural changes at NZTR to achieve this. We have implemented and developed five permanent Board Committees. These are Dates, Finance, Funding, Integrity and Staffing.

While responsibility for these central areas of NZTR activity remains with the Board, it is the role of these Committees to make recommendations for the Board's consideration. Details of these

five Committees are listed on page four of this Annual Report.

#### ORGANISATIONAL CHANGES

The Board also initiated substantial organisational changes within NZTR Management during 2005/06. Paul Bittar was appointed Chief Executive early in the new season and joined us in November, taking over from Allan Fenwick. Paul, who grew up in Australia, holds a Bachelor of Business Degree, is a chartered accountant, and holds an MBA. His lifelong love of sport and particularly racing drew him to Racing NSW followed by the British Horseracing Board. He occupied senior management positions in finance/projects at both organisations. Changes to NZTR's organisational structure are covered in detail in the Chief Executive's Report on the following pages

During the year the Wellington Racing Club Industry Committee and the Warrant of Fitness Implementation Committees successfully carried out their tasks, as set out in their terms of reference, and were duly disbanded on completion. I would like to thank Board members Keith Neylon and Graeme Sanders for their chairmanship of these two committees respectively.

Racing Victoria's Chief Handicapper, Greg Carpenter, carried out a thorough review of our Handicapping and Ratings systems, which was introduced on 1st August 2005. I am delighted that the subsequent report complimented our systems.

It is inevitable that some will meet any new initiative with scepticism. Our ratings system is a year old and bedding down well. As originally intended, the flexibility of the ratings is now allowing clubs and programming committees to write race conditions that will encourage better use of our horse population and allow horses to move up and down the handicap more quickly. NZTR is always reviewing its ratings system to ensure it is delivering what racing wants.

#### JUMPING REVIEW

In the latter half of the year the Jumping Racing Review Committee was formed under John Boyle's independent chairmanship. It is anticipated that this committee will report to the Board in the spring.

At the same time the Board agreed to look at NZTR's role in education and careers in the thoroughbred code. Peter Hutt is heading this review on behalf of the Board. In the past the racing industry's priority has been to return every cent to stakes. NZTR is refocusing

on investing in our infrastructure while also maximizing returns to owners. Education and training is a crucial part of that. We are at the scoping stage at the moment but we will be in a position to consult with appropriate stakeholders early in the new season.

#### **STRATEGIC VENUES**

The Strategic Venue Project was one of the largest NZTR initiatives of 2005/06. It must be emphasized that this is not a one-off exercise. It is a continuous project and this is why we have contracted a Track and Venue Consultant. Gary Foskett, to continue the work already done and oversee this project for the next 12 months. Thoroughbred racing has a poor record on lost opportunity costs due to abandoned meetings and refunds, particularly when compared to the other two codes. NZTR is currently overlaying the results of the venue inspections with financial and demographic data to better understand our current position and the needs and sustainability of our tracks for the next 20 or more years.

There is a misconception by some in the industry that NZTR wishes to close venues. I take this opportunity to restate that NZTR cannot close any venues. Any decisions on venues must be and is the responsibility of each Cluster. Venues and, crucially, training venues need to work together – geographically and financially. The racing industry cannot continue to support 52 venues. NZTR urges Clusters to consider their strategic venues and their community venues, which enjoy strong community support, to plan where capital expenditure will be most effectively placed to ensure that it grows thoroughbred racing in their region.

A race meeting that results in owners spending a similar combined amount on horse float fees as the total amount of stakes on offer does not make sense for the industry. \$8.3 million of the total additional funding next year has been reserved by the NZRB for infrastructure investment, which NZTR fully supports. These funds will be allotted across all three codes to infrastructure that will provide the most robust investment for the industry on a case-by-case basis.

#### **FUNDING MODEL**

NZTR's proposed funding model was presented to the NZRB at the time this report went to print.

Considerable research was carried out by NZTR over several months to ensure that the basis of our funding proposal for 2006/07 was founded on sound and sustainable principles. What became clear from this research was that New Zealand has fallen behind in the level of stakes offered at its strategic wagering days compared to Australia, although we remain reasonably competitive on our midweek days. We want our owners and trainers to target their horses at the Saturday wagering days; the days that provide the greatest return. There is not a sufficient differential between our midweek and our Saturday meetings to drive that behaviour.

#### **REWARDS FOR CLUBS**

NZTR firmly believes that Clubs should not bear the risk of running industry days and that these should be funded by the industry. Currently clubs are paid predominantly on their off-course performance. This is the area they have least control over. The funding proposals that NZTR has presented to the NZRB looks to improve rewards for clubs for their on-course performance by increasing their on-course commission percentage.

Under NZTR's funding proposals it is intended to introduce the 'free racing' model – no nomination and acceptance fees except for Group and Listed races. Entry fees for Group and Listed races will be standardised.

The returns to owners component of the additional funding, totaling \$20 million will be on a code turnover share basis.

It is recognized by NZTR that punters chase the best product. The thoroughbred code must provide high quality products consistently that punters want and these need to be price competitive. The NZRB has partitioned over \$4 million of the increased funding to returns to punters, which NZTR fully supports. This will bring New Zealand into line with Australian returns and will help set up the right conditions for potential future co-mingling into an Australasian market.

#### **INTEGRITY**

NZTR's single most important role is to ensure the integrity of thoroughbred racing. It is recognised by NZTR that there has been a lack of integrity resources on-course and there has been a lack of investment in these key resources. It is currently looking to recruit three more key personnel for its integrity services. NZTR is also putting in place more training for its integrity staff. In addition NZTR and the Judicial Control Authority (JCA) determined this year to work more closely to ensure that interpretation and application of the rules is consistent. The two organizations are also introducing training of staff.

NZTR's goal to improve its customer service will see considerable improvements to our online capabilities and a redesign of our website. It is anticipated that our online trainers' service will be in place for the new season and the new website will be launched in late September.

#### **FORUMS**

The Board agreed during the year to place more emphasis on regional forums. Forums allow much wider attendance and participation. In future there will be two forums per year, instead of one at present – one in May/June and the other in November/ December. It was also agreed that the AGM should be held at different racing locations each year, thereby equalizing regional involvement and costs over the years.

#### **APPRECIATION**

Finally, I take this opportunity to thank my fellow Board members for their considerable work on behalf of New Zealand thoroughbred racing over the past year. It has been a year of change and enormous progress.

GUY SARGENT CHAIRMAN

# chief executive's report of 2005 / 2006

#### **BACKGROUND**

Having arrived from London in November 2005, I took over from Allan Fenwick, a long-serving and loyal servant to racing. I came to New Zealand with recent experience in both the Australian and British racing industries, attracted to the challenge of what we can achieve here.

Having seen first hand the benefits of a commercial and customer focused model being applied to the sport (as it is in Britain and Australia) I know similar benefits can be achieved in New Zealand.

The New Zealand market is somewhat different to Britain, where the on course experience has a vibrancy about it that has inspired record crowds and driven record revenues in recent times. This growth in revenues has been driven largely through the commercial efforts of racecourses. Our racecourses are making strides in this area. Aggressive changes to the calendar, the development of Clusters to share risks and on course initiatives at many feature meetings will drive improved club profitability.

To lead this type of challenge, at New Zealand Thoroughbred Racing (NZTR) we initially required a restructure of our organisation. We simply did not have the capabilities, to meet the needs of driving the sport on a commercial basis. The investment in people and resources had been meagre, a microcosm of what has taken place in the broader industry. This is not a criticism, but acknowledgement this is a decisive issue for both NZTR and New Zealand racing – more investment is needed.

Internal changes were required and our organisation is already seeing significant benefits of this. Vast improvements in our management systems, financial controls and reporting, are delivering NZTR for the first time, crucial management information for decision making. Engaging well trained and energetic staff has had immediate benefits and positive impacts on our capabilities.

Going forward, NZTR will ensure all our staff are successfully developed in their respective fields and trained in the latest technologies. This will enable us to deliver up to date, efficient and customer-focused services. We are very fortunate to have a passionate and dedicated team in place. While a restructure process is always difficult, I'm confident all staff, and crucially the industry, will profit from the changes.

### TAXATION RELIEF AND BUSINESS PLANNING

2006 has already been a watershed year for the New Zealand racing industry.

Confirmation of a reduction in duty for racing (and an accelerated write-down regime for bloodstock) delivering the three codes an additional \$32M per season.

The changes will significantly improve the economic potential of the racing industry. However, what is now needed is the redefining of our sport to ensure that the benefits from the taxation relief are used to provide a sustainable and profitable future for the industry.

The New Zealand Racing Board (NZRB) has confirmed that the general direction of partitioning will be consistent with that included in the original taxation submission to the Minister in January 2005, as follows (for 2006/07):

- \$4.1M for improved returns to wagering customers (reduction in takeout rates)
- \$8.3M for targeted infrastructure investment
- \$20.0M for improved returns to Owners

The delivery of this duty benefit must not distract the NZRB and the three codes from developing robust plans in

meeting the target balance of benefits of \$50-65M in future years. Seamlessly integrated business plans between the three code businesses and the NZRB is central to delivering this.

#### **INTEGRITY**

During 2005/06 the Board of NZTR established an Integrity Committee with a view to it considering all Integrity issues and making recommendations to the full Board.

The Board has agreed, in principle, that where our local conditions are suitable, integrity rules and procedures should be aligned with Australia. Given the large interchange of horses and personnel, this is a sensible and mature decision, effectively moving towards an Australasian set of practices.

The first of these changes was to adopt an expanded list of notifiable racing gear. This requires notification of gear changes by the trainer to NZTR prior to the withdrawal deadline if a horse is entered to race. This change will take effect from the new season and has been very well received by the industry, particularly the often overlooked punter.

A more rigorous swabbing programme, resulting in an increased number of samples being collected for testing, has also been approved following a

recommendation from the Integrity Committee.

Going further, the Board has agreed (racecourse logistics allowing) to implement a 'full' testing programme over three years. This will ultimately see a sample being collected from all race winners, as well as all Group and Listed place getters, plus other discretionary samples. There will be an increased cost in this enhanced programme, however the protection of our racing integrity and black-type must be ensured.

The Board has also agreed to conduct a level of testing at qualifying trials in the new racing season, seeing a programme developed where horses will be subject to testing for prohibited substances.

During the year, a level of drug testing of riders was undertaken and NZTR will continue drug testing of riders. This is not limited to jockeys who ride on raceday, but extends to riders who ride, or present themselves to ride, a horse at trackwork.

One of the principal Integrity items considered during the year related to the Rules of Racing themselves.

Preliminary work has now commenced on a comprehensive review of the existing Rules of Racing. This review will continue throughout the new season. It will focus on simplifying and reducing

the number of Rules, modernising the Rules into plain English, and ensuring that all defined terms are consistent throughout the Rules.

It was with disappointment that I recently received Noel McCutcheon's retirement letter. Noel has been NZTR Chief Steward for many years. He was highly regarded, and his firm but fair approach to raceday integrity activities will be missed. High quality thoroughbred Stewards are very hard to find, and NZTR's failure to put in place an effective succession plan has exposed our business to a degree of risk. The challenge for us is to identify key resources and put in place a robust training and development programme. This will ensure we have future requirements and successions in place.

Integrity is our primary function and the Board of NZTR is fully committed to maintaining and improving the level of integrity across the industry, ably supported by a committed and experienced field force. The Integrity Committee will continue to monitor and review all Integrity issues throughout the coming season. As an Executive group, we will more proactively communicate the changes and policy with the industry, and I thank Chris Weder for his valuable assistance in this area.

#### RACING AND HANDICAPPING

#### NATIONAL RACING BUREAU (NRB)

Alan Cole and his dedicated team of staff continued the excellent work of the National Racing Bureau (NRB) through 2005/06. In all, the NRB serviced 299 racedays and 88 trial days, and many thousands of phone calls and enquiries. The NRB is an excellent example of the benefits that can flow from having efficient, centralised services, and allowing the racecourses to focus on more productive activities and developing their business.

The NRB team is currently working on a key development to enable Trainers to conduct all their racing transactions securely online. A focus group with leading Trainers held in June 2006 strongly endorsed the direction being taken. This functionality ('NRB Online') will be available from early in the new racing season.

#### **RACING**

The Strategic Review of the Pattern of Racing and subsequent implementation of those recommendations has been a success. Other key racing initiatives throughout the year were:

 Closer working relationship with NZRB including raceday control, dates and review of existing practices to minimise duplication;

- Annual Jumping review in
   December 2005 and changes
   effected for 2006 jumping season
   including streamlining of subsidies,
   amateur riders race series and
   consistency of jumping fences
   throughout the country;
- Ongoing review and changes to NZTR policies in respect of field selections, nominations left open, minimum number of acceptors, dual acceptors, definition of stake earnings, criteria for early entry races;
- Ongoing administrative support to Regional Programming Committees.

#### **HANDICAPPING**

Early in 2005 an independent review of NZTR's Handicapping operations and Ratings Based Handicapping (RBH) was undertaken by Greg Carpenter, Chief Handicapper at Racing Victoria Limited. Greg's review endorsed our existing operations and continued to establish closer liaison with handicapping operations in Australia.

The Board then decided on the introduction of races based on rating bands from August 2005. While presenting some issues, this decision has been borne out as the correct one, particularly as race programmers now

have increased flexibility of race bands they can program. This will provide better opportunities to optimise the usage of our horse population, a key element of driving wagering growth.

Further, NZTR Handicapping operations were enhanced by:

- Improved website functionality on ratings;
- Appointment of a new handicapper;
- Analysis to allow realignment of the WFA scale back to an Australasian scale.

NZTR will shortly release a formal Handicapping Policy, which while not alleviating all industry debate, will provide greater clarity for participants as to how Ratings and Weights are arrived at.

#### **BUSINESS DEVELOPMENT**

#### **FINANCE**

NZTR Finance systems and controls have been significantly enhanced throughout the year. NZTR now works in conjunction with the NZRB Finance Department, and there are many synergies and benefits flowing from this. The enhancement in our systems and controls has been acknowledged by our Auditors, who complimented NZTR on the vast improvement over previous years. In addition, policy and procedural changes in the processing

of outstanding debts owed to NZTR will result in these matters being dealt with more efficiently and in accordance with the Rules.

#### **INFORMATION TECHNOLOGY**

2005/06 was another year where significant investment has been made in our core computer applications and services. This included investment in our hardware infrastructure to provide a level of redundancy protecting against any significant downtime due to hardware failure. Many other key software and hardware projects were undertaken including extensive work required for the implementation of handicap ratings and improvements to the club and Owners settlements process.

NZTR is committed to enhancing its business processes and services, and has recently commenced the following development work:

- NRB Online;
- Video streaming of race replays;
- Text and email services;
- Website redevelopment project currently in the design phase, with a launch date set for later this year.

  There will be many new content areas on the site, with one of the main components being the 'Go Racing' section, aimed at explaining

'when/where/why and how' to go racing to a broader consumer audience.

#### STUD BOOK AND REGISTRATIONS

The continuing decline in foal crops was reflected in the number of certificates issued for the 2005 crop totalling 4,500, a figure of 100 less than in 2004. Similarly, it is likely the number of mare returns will be down to 6,700, a slight fall on 2004.

Micro-chipping of foals is now in its second year and is running smoothly. The first crop of horses will hit the tracks from 1 August and development of race meeting procedures is currently under action.

The Stud Book continued its essential role as a member of the International Stud Book Committee. We have had discussions with the Australian Stud Book (ASB) about opportunities to develop joint initiatives, including online services, and programmes to enhance the transfer of horses between the two nations.

It is our intention to develop the teams currently working in the Stud Book and Registrations area into one pool of Operations customer service staff. This is a key decision, designed to deliver enhanced service and systems. We have taken the decision to supplement

resources with management who have experience in developing online systems and process improvements.

#### **VENUES**

The venue inspection project was a major undertaking, and Campbell Moncur should be congratulated for the co-ordination of this huge project. Campbell was assisted by a project team and all the NZTR field staff around the country. It will be essential that follow up action is in place to ensure the guidelines as set by NZTR are implemented.

This work will provide an important element of the work associated with the code Strategic Venue Plan, required by the NZRB. This plan will enable our code to minimise the risk associated with venues and abandonments, as well as driving wagering growth and returns to participants through better utilisation of venues. The second phase of this venue plan will include an assessment of all-weather surfaces for racing purposes in New Zealand.

### COMMUNICATIONS AND PUBLISHING

NZTR transparency ensures that decisions, policies, protocols and actions we take are communicated to the industry as quickly and as clearly as possible.

We are driving more of our communication electronically but appreciate that many stakeholders rely upon printed media. To this end the 'Thoroughbred Racing Monthly' has seen several improvements through 2005/06 which have aimed to better serve its readers.

NZTR also communicates via the weekly 'Media Bulletin' and 'Circulars' for specific industry matters and the 'NZTR Board Report'.

The decision to broaden our Regional Forums to a wider audience and increase them to two per year illustrates our desire to engage in more discussion with all industry stakeholders and to encourage more robust discussion. We are committed to putting more emphasis on the part Regional Forums play, as the AGM is restricted to just Club Presidents and Secretaries, which is a relatively narrow representative group of the industry.

#### **EDUCATION AND TRAINING**

Investment in people has not been a priority for the industry in the past, where the focus has been to return every cent to stakes. However, while stakes are crucial, so too is ensuring there are sufficiently trained jockeys, farriers and vets, as well as effective field and administration staff to drive

the business. If we want to attract good people with the right skills to this industry we must be prepared to invest in them.

Within NZTR we have begun a programme of upskilling both our field staff and our team in Wellington. To help us in this process during the year we put in place an agreement with the NZRB to provide our HR services. This includes consultation and advice on training needs, with a focus on improving our customer service provision.

In addition we are embarking on specific training for our integrity staff. We have identified suitable training courses for Stewards in Australia, and spending time with the Stewards' Panels there, both in Victoria and NSW.

NZTR is also reviewing our current education and careers provision for those coming into the industry and at the structure that delivers that provision. Identifying for example, through available data, how many apprentices we will need to be recruiting now to ensure we have sufficient jockeys in five to 10 years time.

We are also looking at developing new recruitment strategies, including the possibility of curriculum in schools where e-learning will be an important tool. We must be able to establish

genuine career paths for those entering the industry, and further, ensuring that those who come into the industry can be retained in racing. Assistance will be given to our education providers by way of further training, while ensuring funds devoted to training are not exhausted on administration, but used at a grass roots level.

This is a vast project, being driven internally by Simon Cooper and Board member Peter Hutt, who will soon be in a position to consult with the industry to bring together some proposals

#### **REGIONAL FORUMS**

During June 2006 NZTR undertook a series of Regional Forums throughout the country. The forums are designed to communicate to the industry our plans and gain feedback from stakeholders on relevant issues. Much of the focus of the latest forums was on new funding and stakes policies. We outlined our plans to develop the funding policy by way of increasing returns to participants, not just the much needed stakes increases.

We tackled the idea of developing our strategic wagering days and the venues where certain fixtures are run. There exists an outmoded notion that all venues are entitled to, or suitable for, strategic wagering days. This fails to recognise the financial benefits of

certain courses generating significantly greater funds for the sport through increased wagering.

This is not about favouring the interests of metropolitan racecourses over those in provincial areas. In fact, it is to enable those commercially focused racecourses to plan and grow their businesses for the betterment of the industry. Instilling greater competition into the race dates allocation process will similarly provide an opportunity to expand and improve the industry's returns.

#### **CONCLUSION**

Provided here is just a snapshot of the past 12 months in terms of initiatives and achievements, as well as an outline of the changes required if the New Zealand thoroughbred industry is to grow its returns and retain its relevance in the international racing community.

I urge people to understand the principles of maximising wagering growth and returns; the benefits of optimising the use of our horse population; the critical need for investment in people and resources (including racecourses), and; the ability of our unique sport to capture the imagination of the public and consumer. Finally, I would like to express my thanks to my partner Jacqui, Chairman Guy Sargent and the Board, NZTR

Executive and staff, the race club managers and Committees, and crucial industry stakeholder groups who have supported me since I arrived in New Zealand. We have a wonderful and unique opportunity to grow our sport, but collective industry support and commitment to change is crucial.

I would also like to acknowledge the support of the NZRB Chief Executive and his management team for their firm commitment to supporting our business, assisting us to develop synergies, and in driving new on-course initiatives including Destination Summer Holiday Racing.

While the challenge to redefine and reinvigorate both our organisation and sport is immense, the potential rewards for New Zealand racing are significant.

PAUL BITTAR
CHIEF EXECUTIVE

## mercedes thoroughbred racing awards

THE 15TH ANNUAL MERCEDES THOROUGHBRED RACING AWARDS DINNER, SPONSORED FOR THE SIXTH CONSECUTIVE YEAR BY DAIMLERCHRYSLER, WAS HELD IN THE CHRISTCHURCH CONVENTION CENTRE ON FRIDAY, 12TH AUGUST 2005.

The final number of guests exceeded 500 with support from all sector groups, together with the Canterbury racing fraternity, and entertainment from The Beat Girls ensured that the night was a huge success.

Xcellent was a popular choice as Mercedes Horse of the Year as was the announcement of long-time industry supporter and participant, Graeme Rogerson, as the recipient of the Contribution to Racing award.

## mercedes roll of honour

The notes following are to be read in conjunction with these financial statements

#### FOR THE YEAR ENDED 31 MARCH 2006

#### 1. STATEMENT OF ACCOUNTING POLICIES

The accounting policies which the Board considers appropriate for the measurement and reporting of the results and financial position are as follows:

#### **REPORTING ENTITY**

The General Account is the administrative account of New Zealand Thoroughbred Racing Inc.

The financial statements have been prepared in accordance with generally accepted accounting principles.

#### **BASIS FOR PREPARATION**

The measurement base adopted is historical cost. Reliance is placed on the fact that New Zealand Thoroughbred Racing is a going concern. Accrual accounting is used to match expenses and revenues.

#### **CHANGE IN ACCOUNTING POLICIES**

There have been no changes in accounting policies during the year.

#### SPECIFIC ACCOUNTING POLICIES

The specific accounting policies used in the preparation of the financial statements are as follows:

#### a) Trade Debtors

Accounts receivable are stated at their estimated realisable value after writing off any debts considered uncollectable.

#### b) Property, Plant & Equipment

Are stated at cost less accumulated depreciation which has been calculated on the following basis:

Office Equipment, Furniture & Fittings 20% on dimishing value Motor Vehicles 20% on dimishing value

Computer Equipment 20% straight line

Bloodtyping Unit Equipment 20% on dimishing value

#### c) Investments

Investments are stated at cost

#### d) Taxation

The New Zealand Thoroughbred Racing Inc is the administrative body overseeing the operations of the country's thoroughbred horse racing and racing clubs. They are specifically mentioned in the Income Tax Act 1995 as being exempt from income tax. Accordingly, no income tax has been provided for in the financial statements.

#### e) Reserves

The policy of making specific allocations from net operational profit to cover estimated future costs of specific projects has been continued.

#### **COMPARATIVE INFORMATION**

Due to the change in reporting format, comparatives have been amended to ensure comparability with current year disclosures. These changes do not have an effect on reported profit.

#### FOR THE YEAR ENDED 31 MARCH 2006

#### 2. NATURE OF BUSINESS

The New Zealand Thoroughbred Racing Inc is the administrative body overseeing the operations of the country's thoroughbred horse racing and racing clubs.

#### 3. CAPITAL COMMITMENTS

There are no capital commitments as at 31 March 2006. (2005:\$nil)

#### 4. CONTINGENT LIABILITIES

We are not aware of any litigation in process except, NZ Livestock Limited (NZLL) who issued proceedings against NZTR on 22 December 2005 in relation to the New Zealand Incentive Scheme Series (NZISS) and New Zealand Thoroughbred Bonus Scheme (TBS), claiming NZTR acted anti-competitively when establishing the TBS. NZTR is currently awaiting a response to NZTR's Notice requiring further and better particulars of the claim from NZLL. The financial impact of this proceeding, beyond legal costs, is unclear at this early stage.

#### 5. LEASE COMMITMENTS

Lease Commitments as at 31 March 2006 are as follows: (2005:\$nil)

#### **Motor Vehicles**

Due in 12 months – Current \$6,097

Due in 1-5 years – Non Current \$11,178

#### 6. PROPERTY, PLANT AND EQUIPMENT

		Accumulated	2006	2005
	Cost	Depreciation	NBV	NBV
	\$	\$	\$	\$
Office Equipment, Furniture & Fittings	435,828	206,598	229,230	279,444
Motor Vehicles	279,300	107,218	172,082	189,123
Computer Equipment	2,461,284	1,856,379	604,905	1,070,485
Bloodtyping Unit Equipment		-	_	74,798
Total	\$3,176,412	\$2,170,195	\$1,006,217	\$1,613,850

Fixed Asset additions during the year totalled \$409,732, comprising of Computer Programmes and Equipment \$317,012, Office Equipment, Furniture & Fittings \$18,655 and Motor Vehicles \$74,065.

The Bloodtyping Unit Equipment was sold to Massey University in March 2006.

	\$905,314	\$442,155
Bloodtyping Unit Equipment	14,961	18,699
Computer Equipment	780,916	339,270
Motor Vehicles	40,568	47,282
Office Equipment, Furniture & Fittings	68,869	36,904
	\$	\$
Depreciation Expense	2006	2005

Computer Programmes and Equipment depreciation was found to be under depreciated in previous years therefore an additional write off of depreciation of \$378,178 was made this year.

#### FOR THE YEAR ENDED 31 MARCH 2006

#### 7. ACCUMULATED FUNDS & RESERVES

Closing balance	(\$406,510)	\$555,329
Transfer from Net Profit/(Loss)	(961,839)	555,329
Opening balance	555,329	-
CODE DISTRIBUTION		
Closing balance	<b>\$143,755</b>	\$143,755
Transfer from Net Profit/(Loss)		82,644
Opening balance	143,755	61,111
CLASSIC RACES STAKES SUBSIDY		
RESERVES:		
RETAINED PROFITS AT END OF YEAR	\$3,563,624	\$4,295,082
Transfer from Stud Book	-	192,674
Transfer from Capital Reserve	-	1,096,031
Net Profit/(Loss) After Extraordinary Items	(731,458)	841,107
RETAINED PROFITS AT START OF YEAR	4,295,082	2,165,270
	\$	\$
	2006	2005

With the introduction of the Racing Act 2003 on 1 August 2003 responsibility for the payment of funding to clubs became that of the code governing the body. Under Section 17 of the Act the New Zealand Racing Board (NZRB) is to pay its distributions to the codes.

Each racing code is then responsible pursuant to Section 25 to distribute this funding to clubs in line with their funding policy. Funding allocated for this purpose is set aside in the Code Distribution Account with settlements paid to clubs by the NZRB on NZTR's behalf after each race meeting.

For the year ended 31 March 2006, NZRB distributed to clubs on NZTR's behalf in excess of the available funds in the Code Distribution Account creating a deficit.

#### **CODE SUPPLEMENTARY FUND**

Closing balance	\$528,780	\$360,901
Transfer from Net Profit/(Loss)	167,879	360,901
Opening balance	360,901	-

The NZ Racing Board agreed in August 2003 to make funds available to be used in supplementing stakes.

The amount is received in trust to be fully paid on to individual thoroughbred racing clubs for the support of race day stakes.

The closing balance is the amount not yet expended at 31 March 2006.

#### NZ THOROUGHBRED BONUS SCHEME

Closing balance	\$1,916,864	\$1,568,154
Transfer from Net Profit/(Loss)	348,710	1,568,154
Opening balance	1,568,154	-

The NZ Thoroughbred Bonus Scheme makes payments to horses enrolled in the scheme that win, or are placed in specified bonus races. All NZ Thoroughbred Bonus Scheme funds are separately invested and accounted for as a special reserve that can only be applied to the NZ Thoroughbred Bonus Scheme.

#### FOR THE YEAR ENDED 31 MARCH 2006

#### 8. FINANCIAL INSTRUMENTS

#### NATURE AND EXTENT OF ACTIVITIES

New Zealand Thoroughbred Racing Inc has exposure to financial instruments principally through debtors, cash, short term bank investments and creditors. It does not enter into transactions involving off balance sheet financial instruments.

#### **FAIR VALUE**

The carrying value of all Statement of Financial Position financial assets and liablities are considered to be equivalent to their fair value, except for loans & advances which are impractical to measure their fair value as they are interest free.

#### **CREDIT RISK**

Financial instruments, which potentially subject New Zealand Thoroughbred Racing to concentrations of credit risk, consist primarily of cash at bank, short term investments and debtors.

New Zealand Thoroughbred Racing places its cash and short term investments with quality financial institutions, such as the ANZ Bank. Amounts owed to New Zealand Thoroughbred Racing are mostly due from entities in the racing industry and hence credit risk is considered low.

#### AUDIT REPORT

### TO THE READERS OF THE FINANCIAL STATEMENTS OF NEW ZEALAND THOROUGHBRED RACING INCORPORATED

We have audited the attached financial statements. The financial statements provide information about the past financial performance of New Zealand Thoroughbred Racing Incorporated and its financial position as at 31 March 2006. This information is stated in accordance with the accounting policies set out in the notes to the financial statements.

#### Board's Responsibilities

The Board is responsible for the preparation of financial statements, in accordance with New Zealand law and generally accepted accounting practice, which fairly reflect the financial position of New Zealand Thoroughbred Racing Inc as at 31 March 2006 and the results of its operations and cash flows for the year ended 31 March 2006.

#### Auditors' Responsibilities

It is our responsibility to express to you an independent opinion on the financial statements presented by the Board.

#### **Basis of Opinion**

An audit includes examining, on a test basis, evidence relevant to the amounts and disclosures in the financial statements. It also includes assessing:

- the significant estimates and judgements made by the Board in the preparation of the financial statements, and
- whether the accounting policies are appropriate to New Zealand Thoroughbred Racing Inc's circumstances, consistently applied and adequately disclosed.

We conducted our audit in accordance with New Zealand Auditing Standards. We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatements, whether caused by fraud or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

Other than in our capacity as auditors we have no relationship with or interests in New Zealand Thoroughbred Racing Inc.

#### **Unqualified Opinion**

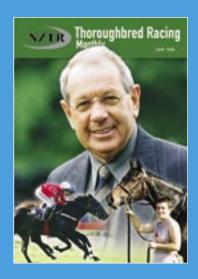

We have obtained all the information and explanations we have required.

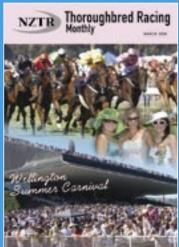

In our opinion the attached financial statements fairly reflect the financial position of New Zealand Thoroughbred Racing Inc as at 31 March 2006 and the results of its operations and cash flows for the year ended on that date.

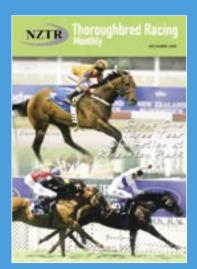

Our audit was completed on 16 June 2006 and our unqualified opinion is expressed as at that date.
